-

PROFESSIONAL EXPERIENCE

Full Stack Developer

Responsive - Remote

Dec 2022 – Jan 2026

(Transition Phase into Modern Stack)

- Worked on multiple real-world applications using **Node.js, React, Next.js, and modern databases**.
- Gained hands-on experience across frontend, backend, and data layers.
- Contributed to payment systems, analytics platforms, and mobile applications.

Krackwins - Sports Betting Picks App

- Fixed and enhanced **Stripe payment gateway integration**.

- Worked with **Node.js, Express.js, and MongoDB** backend systems.
- Debugged API flows, payment failures, and backend logic.
- Gained real-world exposure to payment workflows and server-side architecture.

Tech Stack: Node.js, Express.js, MongoDB, Stripe, REST APIs

Lucy – Psychedelics Dose Tracking App

- Contributed to mobile application **Lucy**, a dose-tracking platform.
- Worked on a **React Native mobile application**.
- Used **Airtable as the backend/database** for structured data storage.
- Assisted in managing data flow between mobile app and backend services.

Tech Stack: React Native, Airtable

Conversion Monitor – Analytics Application

- Worked on **Conversion Monitor**, an analytics platform built with **Next.js**.
- Used **Supabase (PostgreSQL)** as the primary database.
- Implemented features to analyze and process **Google Analytics 4 (GA4)** data.
- Worked with **Next.js SSR, API routes**, and backend data handling.

Tech Stack: Next.js, Supabase (PostgreSQL), GA4 APIs
